

Always set your profile to PRIVATE so that only people you know can see

Set different passwords for each site, so if you get hacked then not all of your accounts will be

Don't post personal info like birthdays or addresses online, you don't know who will be able to see it

Don't post photos of people who don't want to be online and make sure you take down photos if someone asks you to

PROTECT YOURSELF ONLINE

Make sure you have appropriate filters on your internet browser. Keep antivirus and firewalls up to date.

Make sure you know how to block, delete or report someone on all of your accounts.

Be careful about posting things you don't want everyone to see, once it's out there it's very hard to get it back

Only accept people you know as friends
